Agenda 10th Sept

- Panel discussion with representatives of AfroPHC supporting organisations
- What does the community expect from ambulatory PHC service delivery in Africa?
- What is the way forward?

PANEL DISCUSSION

Group Discussion

- Random groups of 8-12 for 45min x 1 round
- Appoint facilitator to chair
- Appoint rapporteur to take notes & tape (max 10 lines per question)
- Quick introduction: Name, Professional Background, Place
- Regroup at 5.45 pm (15 minutes of videos before feedback)
- Feedback via Mentimeter (note code above)
- Report on "Question" and "Way Forward"

GROUP DISCUSSION

Join the Group Discussion

If you are still here then you are missing out on some group discussions.

Hover your mouse over your screen until the menu at the bottom shows. You should see the "unmute audio", "show video" at the bottom left. Check for "Participants" and click to see the "Join" button on the list of participants.

Click and then join your group. Enjoy!

KNaan (3.44)

Documentaries

- SA Public Health System (6.17 min)
- Nigeria's healthcare system (9.49 min)

SA Public Health System (6:17 min)

Nigeria's healthcare system (9.49 min)

GROUP FEEDBACK

Share five word on your thoughts now.

A word cloud visualization where words are arranged in a grid. The words are color-coded and have associated smaller text below them. The words include:

- knowledge (yellow)
- relaxed (blue)
- overwhelmed (red)
- good (pink)
- great (orange)
- collaborative (green)
- interesting (yellow)
- a little bit sleepy (red)
- humble (red)
- expectant (blue)
- learning (green)
- educated (blue)
- humbled (yellow)
- informative (green)
- motivated (blue)
- fruitful (orange)
- cordial (pink)
- fine (pink)
- informed (red)
- hopeful (orange)
- comfortable (red)
- happy (red)
- interested (green)
- intrigued (pink)
- global (green)
- lack collaboration (orange)
- energized (red)
- tired (blue)
- gud (pink)
- excited (blue)
- nice (blue)
- family (yellow)
- inspired (pink)
- friendly (red)
- supportive (green)
- educative (red)
- honoured (blue)
- intrigued (pink)
- pensive (green)
- convenient (green)
- interactive (blue)
- challenged (yellow)
- engaged (blue)
- encouraged (purple)

Words feedback on "What does the community expect from ambulatory PHC service delivery in Africa?"

Group feedback on "What does the community expect from ambulatory PHC service delivery in Africa?"

Quality

We are talking about what the community expects, however, we don't have any community representatives here to speak for themselves! Also, we have been talking about CHWs, but no CHWs are here? So we still don't hear THEIR voices...

Quality

Knowledge and best practice

friendly, accessible, quality services from qualified staff within a reasonable

Quality and sustainable services

Importance of multidisciplinary teams, accessibility for services especially in rural areas, need for participatory action methods to assess and drive community needs.

Friendly services Empowering the clients : health education: promotion; prevention provision of socially acceptable services

affordable

Group feedback on "What does the community expect from ambulatory PHC service delivery in Africa?"

Importance of mentorship and preparing students for team work within PHC services, reducing the power hierarchy between Health care providers and the community

Community-Health facility linkages

Appropriate referrals in terms of time, place and person

Work force: the cadre and number of skilled clinicians required should be informed by a needs assessment that should be scientifically conducted. Preparation of PHC workers should also be patient-centred. Affordability and availability of medications

Need for rehabilitation services such as Occupational therapy and Physio

cost-effective and socially acceptable and available services

Various health services available: physio, mental health, nutrition, occupational therapy... all on the same place

Linkage to the community

Health workers also need to review their own expectations from the patients and if these are even fair. Community diagnosis to identify the needs of the community so that care is tailored to specific needs

Group feedback on "What does the community expect from ambulatory PHC service delivery in Africa?"

Effective communication

Community voices ! Absent in this workshop

Holistic approach and liaising with the multidisciplinary team when treating a patient. Prevention and promotion of health care. Accessible services within the community, mobilization of resources from private sectors and share resources.

Change in health-seeking behaviour

Regular feedback and follow ups

Inter-professional collaboration and collaboration with community members.

- partnership with the community, Access to care (financial access, affordability, good attitude from the team, reduced waiting time), comprehensiveness (including drugs availability), continuous relationship, responsiveness, care close to people

ACCESSIBLE(geographically, financially, sufficient multidisciplinary HR, infrastructure) Availability (essential medication, infrastructure, equipment) Affordability for health system and patients). Responsive to health needs of the community.

IPE training at academic institutions, recognition and training of CHW's.

Group feedback on "What does the community expect from ambulatory PHC service delivery in Africa?"

Outreach services

Public-private partnerships

Services that meet their needs

Involvement in the planning, implementation and monitoring of their own health

Motivated health care workers

Advance IPE

Transparency of services available to the community is also important

Affordable
